The information in this report which relates to resources is based on information compiled by Mr. Jeremy Whybrow who is a Director of the Company and who is a Member of the Australasian Institute of Mining and Metallurgy. Modeling and Resource estimation was undertaken by Mr. Robert Spiers a full time employee of Hellman and Schofield Pty Ltd and who is a Member of the Australian Institute of Geoscientists. Mr. Whybrow and Mr. Spiers have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

Mr. Whybrow and Mr. Spiers consent to the reporting of this information in the form and context in which it appears.

Convergent believes that considerable scope exists to increase this mineral resource by drill testing deposit extensions and also by locating new deposits located within this highly prospective tenement package.

The Company plans to drill at least 15,000 metres on extending the mineral resources while evaluating development options for the project.

Figures in the above table may not sum due to rounding.
